

Die Follow Up Service

Fake gas springs are dangerous. And more importantly, very hard to distinguish from an original. To fight the growing issue and ensure safety at your workplace, we offer you our free Die Follow Up Service. Let us verify your products, and help you stay safe.

LET US VALIDATE YOUR GAS SPRINGS!

The service includes a KALLER technician going on site to the die builders and to validate that all gas springs and mounts are authentic KALLER products.

Email the information to your local KALLER sales representative or customer service location and they will follow up with our Asian team to schedule the service. Once service is completed you will receive a signed Die Follow Up Service inspection report.

Learn more about the service [here](#) or contact us at info@kaller.com.

WHAT WE NEED FROM YOU TO PERFORM THE SERVICE:

- 1. Die builder name and contact information**
(phone number, address, name)
- 2. Die information**
(program number, number of dies etc.)
- 3. Timing** (when the dies will be ready for inspection and when they will ship)
