

Power Line XF series

XF 750, XF 1000, XF 1500, XF 2400

- introducing a new gas spring meeting FCA standard

Features and benefits

- Extremely compact and powerful rod sealed gas spring based on our X-series available in four sizes
- KALLER now fulfills the Automotive standard FCA (Fiat Chrysler Automotive) 075.90.60 Nitrogen Gas springs with the additional sizes from XF 750 to XF 2400
- Other Power Line sizes like X 170 to X 500 and X 4200 to X 20000 already fulfills the FCA standard
- All XF models have G 1/8" side port with only 10 mm additional length compared with standard X series
- Additional bottom thread depth
- The XF shares the same unique KALLER safety and reliability features as the current X and XG series
- The already introduced safety plug solution for the X 2400 is included in the XF 2400 as well
- KALLER world-wide guarantee according to the KALLER catalog

Why does KALLER develop the XF series?

The FCA Fiat Chrysler Automobiles has updated their Gas Spring standard providing a solution using only G1/8" port size and deeper bottom threads from XF 750 and up. This solution required an additional total length of 10 mm compared with the X-series but only for sizes XF 750, XF 1000, XF 1500 and XF 2400. Stroke lengths for the XF series are available only according to the FCA standard, see below.

The other sizes, X 170 to X 500 and X 4200 to X 20000 fulfills the FCA standard.

As KALLER is approved within the FCA standard we are now able to fully supply the gas springs accordingly.

The existing XG series does not fulfill the FCA standard due to total length differences.

Availability

The XF series will be available to order from June 19th 2017 (w. 25)

How to order, example

XF 750 - 38

Model	Size	Stroke
-------	------	--------

Safety, Reliability, Performance and Repair kits

Same as for X and XG models
