

# SPC 800

## Increased Capacity for Stock Lifters

### - Allowing additional attachment mass

In our efforts to continuously improve KALLER products and meet customer needs we have the pleasure to announce that attachment capacity for the Stock Lifter SPC 800 has been increased with 200%

By allowing an increased attachment mass per ram velocity the customer can continue to simplify tool design, saving cost and space.

The increased attachment mass can be applied today on the existing SPC 800.

<b>Max. attachment capacity per lifter</b>	
<b>Metric</b>	
<b>Ram velocity (m/s)</b>	<b>Attachment mass (kg)</b>
0.3	90
0.4	50
0.5	32
0.6	22
0.8	13

Attachment mass assumes balanced load and actuation force.
