

New version of KALLER Safety App

We have done some changes in the KALLER Safety App. In order to make your Safety App continue to work, you need to do the following.

How to update to the new version

1. Uninstall the old app on your mobile phone.

Install the Safety App

Please note that installation differ between **Androids** and **iPhones**.

Android phone

2. First, you must set your phone to allow the Safety App from Strömsholmen AB. Go to Settings> Security and put a tick mark on “Unknown sources” to allow installation of the Safety App.
3. Download and install the app.
Go to: <https://kaller.stromsrv.com/App/Install/Android>
Download the app by clicking “Download and install”.
Install the app by clicking on the downloaded file and Install.

iPhone

2. Go to: <https://kaller.stromsrv.com/App/Install/ios>
Download the app by clicking “Download and install”.
3. Prepare your iPhone to install KALLER Safety App.
Go to Settings> General> Profiles or Device Management, and then click the profile “Strömsholmen AB” to make developer trusted.

Start the app and sign in

4. Close your browser and click on the KALLER app.
5. Log in with your username and password.
Forgot your password? Get a new one by clicking on the “Forgot” button in the app or the “Forgot password” button at:
<https://kaller.stromsrv.com/Account/Login> .
Forgot your username? Email app@kaller.com for help.
