

Updated Die Separation (DS) gas spring

DS 3000, DS 5000 and DS 7500

– introducing the new safety plug feature and top up and bottom up working position

DS gas springs features and benefits:

- Introducing the new KALLER safety plug with overstroke and overpressure safety features
- DS gas springs are now suitable for both top up and bottom up working position in the tool
- Redesigned for easy maintenance
- Service kit is introduced and will be available for all updated models
- Stroke lengths 80, 100 and 125 mm are added
- Unique KALLER safety and reliability features
- A KALLER guarantee of 1 million strokes is offered
- Using DS gas springs is an excellent way to avoid unnecessary wear of the die, press and gas springs
